

# Safaria

Authentic Africa Safari Experience

## PRIVATELY GUIDED SAFARIS

### WHAT IS A PRIVATE OR SPECIALIST GUIDE?

A privately guided Safari is one where your dedicated guide creates an exclusive and personalized experience for your family or travel group. This includes destination selection, logistics, administration as well as the overall Safari experience. Over and above that your Safaria Guide is an expert in the surrounding landscape and creates a unique storyboard and narrative designed around your personal Safari expectations. Your experience becomes an entirely customized one focusing on your personal interests, needs and desires.

### WHY USE A PRIVATE SAFARIA GUIDE?

This is a unique service designed to take all the administrative work and logistics out of arranging your safari. Safaria offers advice, knowledge, and experience to guests wanting a hassle-free safari. We offer this to corporate organizations, families with children and couples looking for an exclusive safari breakaway.

Your Private Safaria Guide becomes the personal liaison between you and the national parks, private reserves, and safari lodges. We ensure that your every need from dietary requirements, to personal experiences, childcare, disabilities, photography, astronomy and special interests are catered for.

Our goal is to create an experiential Safari that engages our guests in the African wilderness whilst also providing much needed rest and relaxation. We introduce our guests to bush craft, animal tracks and signs, reptiles and of course game drives and walking safaris. Your Private Safaria Guide leverages the local rangers and trackers to establish a very specific storyboard that is designed to enrich your experience.

Your Private Safaria Guide becomes your personal liaison, wilderness specialist, familiar face, storyteller and host. This personal touch ensures that you learn more, see more, understand more and ultimately have a deeper and more connected experience with Africa and its cultures and wild spaces.
