

Safaria

MORNING WALK & OPEN VEHICLE DAY SAFARI DRIVE

Experience the Kruger National Park on foot followed by an Open Vehicle Safari drive with your own expert guide. Combining both of these unique experiences we offer guests the opportunity to explore this wilderness as both a participant and an observer. These completely different safari styles combined, provide a thrilling, up close and personal experience with nature. This is truly the best way to experience the iconic Kruger National Park.

DISCOVER MORE:

As the African savanna slowly awakens, you will meet your Trails Guides at one of the designated Kruger National Park entrance gates. Your Safaria guide will together with the field rangers brief you on the morning's itinerary. Departing from the Gate on Open Safari Vehicle you will journey deeper into the savanna where you will then depart from the vehicle and begin your 3-hour walk through Big 5 savanna. Accompanied by two armed Kruger Park field rangers you will slowly make your way through the bush learning about the finer details. Your Safaria guide will explain at a deeper level the finer elements of the savanna biome and how this drives diversity and provides the perfect habitat conditions for all of Kruger species. After you walk you will return to the gate again and board a Safaria open safari vehicle and then journey further into the Savanna making a lunch stop at Skukuza before returning later back to the gate. The combination of these safari styles allows you to touch and feel your way through the wilderness on foot as well as then travel further distances by vehicle and see greater diversity of landscape. Both offer exciting opportunities for Big 5 encounters.
